## Breakwater First On Chamber List

He said fill for this work is obtainable from the SR 717 extension job now in progress but it will take around 20 trucks and some cash contributions to get the work done. ## Why Do We Hang The Mistletoe ?

Why do we hang mistletoe during the holiday season? Thousands of years ago, according to an old Norse legend, the goddess Fraya so loved her son, Baldur, that she asked all the creatures of the air, earth and sea to cherish him. But she over looked the tiny mistletoe, hidden in the crotch of an oak tree. Baldur haunted his invulnerability before all the gods, dared them to test their spears and arrows against him.

Jealous Loki, god of destruction, treacherously discovered the one weapon which could harm Baldur—a twig of mistletoe, sharpened to a spear-like point. Baldur was stretched lifeless on the ground, his hearts pierced with the little mistletoe spear. It took the combined efforts of all the gods to restore him back to life. Then they made the mistletoe swear never to harm anyone again. And the mistletoe promised on the one condition that it never touch the earth.

That is said to be the reason why people hang mistletoe in their houses during the happy holiday season, and greet one another with a kiss when they pass beneath it. For so long as it hangs on high, it brings happiness, safety and good fortune.

## Here Is What Transpired At Monday's Meeting Of The Palm Beach County Commission

Need for stricter enforcement of traffic laws in Palm Beach County was recommended to the county commission this week by a citizens safety committee.

The committee, headed by Judge Joseph Peel, Jr., municipal magistrate in West Palm Beach, recently held a traffic safety forum and the recommendations received by the commission this week were the outgrowth of the forum discussion. Judge Peel, who acted as moderator for the discussion, also advised the commission that the panel group recommended appointment of a county traffic safety committee.

The forum group also noted that in addition to a lack of law enforcement there was also a lack of cooperation on the part of motorists for following traffic regulations and laws.

Other actions by the commission this week included:

Hearing a report from County Engineer J. M. Boyd that proposed joint financing of airport repairs at Lantana between the county and Civil Aeronautics Authority had been abandoned. Boyd said he planned to go ahead and do the work—resurfacing the runways—with county help and equipment. Boyd said to join the CAA on a 50 - 50 financing plan would cost the county \$11,000 for its half share. He said he could

do the entire job for \$9,000.

Boyd also reported that the county's small dredge was being moved to 45th street in West Palm Beach to start pumping fill for the new county children's home to be built near St. Mary's Hospital. The board received a report from the Palm Beaches Sanitary District and learned that all right-of-way had been secured for Selby Road extension.

Commissioner Ben Sundry, Delray Beach, said widening and improvement of Atlantic Ave. in Delray was progressing on schedule and that the contractor expects to have the work completed in about 30 days.

The board learned that an estimated \$142,200 would be paid to the county from surplus gas tax funds for county road work.

## Tax Diversion Of Motorists' Cash Should Be Stopped

HOLLYWOOD—Approximately \$20,000,000 collected in taxes from Florida motorists is now being diverted to other purposes than highway building, and as a result Florida highways are inadequate to meet everyday needs and no funds are available for construction of badly needed roads. This was pointed out by Walter F. Carey, president of the American Trucking Association, speaking before the convention of the Florida Trucking Association here last week.

Carey told association members that if taxpaying motorists would rise up and demand that this diversion of automobile taxes stop

and the federal government cease taxing motorists and leave such taxes to the states for road improvement, the road problem would be largely solved.

More than two hundred million dollars of taxes collected from motorists of the nation are now being diverted to other purposes, he said, and we should put our collective foot down.

Sidney Allen of Tampa was elected president of the association for the ensuing year; B. L. Thomas of Jacksonville, vice president; Hugh Emerson of Miami, corporate secretary and H. E. McDonald of Jacksonville, treasurer.

## \$20,000,000 For New P&G Plant At Perry

PERRY—Proctor and Gamble has purchased the Brooks-Scanlon Lumber Company and 440,000 acres of timber land and plans the establishment of a \$20,000,000 pulp plant here.

Arrangements have been made with Lester W. Foley, president of Foley Lumber Industries, for continued operation of the sawmill to avoid unemployment of Brooks-Scanlon workers, said P. K. Honey, manager of Buckeye Cellulose Corp., which is the name under which the new Proctor and Gamble pulp mill will be operated.

While gratified at having this new industry, the town of Perry is viewing, with concern the problem of providing housing for additional workers and finding money to meet the need for additional school facilities.

Already plans are being made for new subdivisions and housing projects as well as trailer camps and motels. Consideration is being given to extending the city limits and providing additional road and sanitary facilities. Another acute problem is that of providing adequate hospital facilities.

## 'No Mr. Big' Will Be Found In McCarty Administration

FORT PIERCE—Dan McCarty says there will be no Mr. Big in his administration; and adds there never has been any Mr. Big and there will never be any Mr. Big.

Governor-elect McCarty, who takes office in a little less than a month, also warns the gamblers and racketeers that they are not welcome. He adds that he will do everything within his power to keep them out of Florida and will remove from office any public official who tries to let them in.

McCarty is working long hours on the task of preparing for his coming administration, and says that finding good men for the job ahead is his problem right now. Salary seems to be the biggest stumbling block in obtaining the man for the job, and Dan feels he is asking many of his appointees to sacrifice in a monetary way to serve their state. He thinks, therefore, that the legislature should study the probability of raising the salaries of cabinet and the little cabinet members.

He has pledged close cooperation with Attorney General Ervin in fighting the rackets and hopes the state investigators will do a job for him. He intends to ask for an increased state take from Florida dog tracks and will stand for no compromise from the dog lobby, which he terms one of the most powerful influences in the legislature. He favors fingerprinting of race track employees, but cannot do much about that problem as yet. The State Racing Commission and officials of the Horsemen's Benevolent and Protective Association have reached a temporary compromise on that score.

Turning to the question of the Jacksonville Expressway, a super highway project leading through that city, McCarty says he committed himself to continue the project during his campaign when the cost estimate was \$29,000,000. Now that the Road Board Chairman Alfred McKethan has raised the cost estimate to a \$69,000,000

figure, the Governor-elect thinks the matter will have to be thoroughly gone into by the next road board. He also thinks the idea of the proposed Florida Turnpike will have to be examined carefully due to recent rises in estimated costs by McKethan.

He considers the improvement of the East Coast highway an obligation and has asked his road board to build roads that will end the traffic problem in congested areas of the East Coast and the Tampa Bay area. He thinks these two sections should be relieved first.

## Cinematic Chatter

By Marion Miller

Hello everybody! Glamour isn't born, it's made, and through intensive study at that, according to Donna Reed, who certainly displays a healthy amount of it. Donna admits that when she first came into films she wanted to play sultry sirens. Of course that was before she discovered that glamour isn't achieved overnight. "If you doubt this," says Donna, "take a glimpse at the early movies made by Rita Hayworth, Marlene Dietrich, Joan Crawford and Betty Grable. Then compare them with their recent screen appearances, and you'll find that they've come a long way in the right direction, in the matter of allure know-how. Was I disappointed when the studios inevitably cast me as a kid sister," the screen actress recalled. "I had nothing to do but stand around and look sweet, and some other girl always got the hero." During the time Miss Reed was playing ingenues, she took stock of her attributes, watched the more mature stars, and learned the tricks of their trade. "By the time I got the chance to play my first glamour role, in 'Saturday's Hero,' I was ready, and capable of handling the assignment," Donna concluded. Donna has a very wonderful starring role in "Scandal Sheet." She has John

Derek and Broderick Crawford as co-stars. You'll be seeing it locally before too long. See you at the movies—Mal.

# aldrin

Aldrin—approved by agricultural authorities for control of certain soil pests—has established a fine record for wireworm control on sugar cane, corn and sweet potatoes.

Easy-to-use aldrin can be applied to soil in two ways:

1. Apply aldrin directly on the ground, as dust or spray, and harrow it in when preparing seed beds.
2. Have your supplier mix aldrin with your fertilizer and apply with conventional row treatment.

Using either method aldrin is applied in small amounts . . . it's economical. Aldrin gets other insects at the same time. It controls rootworm and other pests . . . is now approved for controlling wireworm on sweet potatoes.

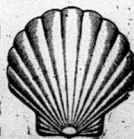

Make your next crop a profitable one, free of wireworm and other destructive insects . . . use aldrin before planting. Your dealer will be glad to give additional information.

### Christian Science Group Of Canal Point

Christian Science church services next Sunday will stress God's saving power. Subject of the Lesson-Sermon is "GOD THE PRESERVER OF MAN."

One of David's Psalms of confidence furnishes the Golden Text: "O my God, I trust in thee: . . . Let integrity and uprightness preserve me; for I wait on thee. Redeem Israel, O God, out of all his troubles" (Psalms 25: 2, 21, 22). Bible readings include: "I will say of the Lord, He is my refuge and my fortress." (91:2).

Among passages from "Science and Health with Key to the Scriptures" by Mary Baker Eddy is this: "The history of Christianity furnishes sublime proofs of the supporting influence and protecting power bestowed on man by his heavenly Father, omnipotent Mind, who gives man faith and understanding whereby to defend himself, not only from temptation, but from bodily suffering" (p. 387).
